

Tropical Sunrise Canna
Canna 'Tropical Sunrise'

Plant Height: 24 inches

Flower Height: 3 feet

Spread: 18 inches

Sunlight: ☉

Hardiness Zone: 8b

Description:

A smaller, dwarf selection that features dramatic beautiful peachy-coral blooms with glossy dark green foliage; a lovely tropical addition to garden beds, borders and patio containers; heat and humidity tolerant; remove spent blooms to promote growth

Ornamental Features

Tropical Sunrise Canna features bold spikes of coral-pink orchid-like flowers with peach overtones at the ends of the stems from early summer to late fall. Its large glossy pointy leaves remain dark green in color throughout the season. The fruit is not ornamentally significant.

Landscape Attributes

Tropical Sunrise Canna is an herbaceous perennial with a rigidly upright and towering form. Its wonderfully bold, coarse texture can be very effective in a balanced garden composition.

This is a high maintenance plant that will require regular care and upkeep, and should be cut back in late fall in preparation for winter. It is a good choice for attracting hummingbirds to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Tropical Sunrise Canna is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting
- Bog Gardens

Planting & Growing

Tropical Sunrise Canna will grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 18 inches. It has a low canopy with a typical clearance of 1 foot from the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant should only be grown in full sunlight. It prefers to grow in moist to wet soil, and will even tolerate some standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Tropical Sunrise Canna is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
