

Inferno Copper Plant
Acalypha wilkesiana 'Inferno'

Height: 3 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 10a

Other Names: Wilkes' Acalypha, Copperleaf

Description:

This variety is much smaller than most, growing to only 3 feet; densely arranged small leaves in shades of copper, plum, and red-orange are impressive in the garden, or containers

Ornamental Features

Inferno Copper Plant has attractive burgundy-variegated green foliage with hints of orange which emerges coppery-bronze in spring on a plant with an upright spreading habit of growth. The small serrated pointy leaves are highly ornamental and remain green throughout the winter.

Landscape Attributes

Inferno Copper Plant is a multi-stemmed evergreen shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects
- Disease

Inferno Copper Plant is recommended for the following landscape applications;

Planting & Growing

Inferno Copper Plant will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It has a low canopy. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.

Inferno Copper Plant makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor containers and hanging baskets. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
