

Sundenia® Red Mandevilla
Mandevilla 'Sundenia Red'

Height: 20 inches
Spread: 24 inches
Spacing: 18 inches
Sunlight:

Hardiness Zone: 10a

Other Names: Dipladenia

Group/Class: Sundenia®; Series

Description:

Vivid red flowers appear on this vigorous, compact selection with a shrubby growth habit; blooms continuously from spring through fall; deep green foliage serves as the perfect contrast; a lovely choice for beds, borders, or patio containers

Ornamental Features

Sundenia Red Mandevilla features bold red tubular flowers with gold throats along the branches from late spring to mid fall. It has dark green foliage. The glossy pointy leaves remain dark green throughout the winter. The fruit is not ornamentally significant.

Landscape Attributes

Sundenia Red Mandevilla is a multi-stemmed evergreen woody vine with a twining and trailing habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This woody vine will require occasional maintenance and upkeep, and can be pruned at anytime. It is a good choice for attracting butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Sundenia Red Mandevilla is recommended for the following landscape applications;

Planting & Growing

Sundenia Red Mandevilla will grow to be about 20 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. As a climbing vine, it tends to be leggy near the base and should be underplanted with low-growing facer plants. It should be planted near a fence, trellis or other landscape structure where it can be trained to grow upwards on it, or allowed to trail off a retaining wall or slope. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This woody vine does best in full sun to partial shade. It requires an evenly moist well-drained soil for optimal growth. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Sundenia Red Mandevilla makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
