

**XXL Hidalgo Dahlia**

*Dahlia 'XXL Hidalgo'*

Height: 24 inches

Spread: 12 inches

Sunlight:

Hardiness Zone: 9b

Group/Class: XXL Series

**Description:**

A beautiful, compact selection producing large peachy-orange double blooms, sitting above medium green, toothed foliage; vigorous and strong branching with great re-blooming qualities, perfect for the garden or patio containers

**Ornamental Features**

XXL Hidalgo Dahlia features showy double yellow daisy flowers with peach overtones at the ends of the stems from mid to late summer. The flowers are excellent for cutting. Its pointy leaves remain green in color throughout the season.

**Landscape Attributes**

XXL Hidalgo Dahlia is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

XXL Hidalgo Dahlia is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

## **Planting & Growing**

XXL Hidalgo Dahlia will grow to be about 24 inches tall at maturity, with a spread of 12 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

XXL Hidalgo Dahlia is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
